Work Experience

Power Distribution Engineer

Aerotek/Gulf Power - Destin, FL

June 2018 to Present

Work closely with builders and homeowners to create prints and estimates for new services to buildings. Maintain a prioritized schedule while meeting deadlines. Create capital jobs to replace worn/expired distribution equipment. Daily use of AutoCAD modeling software.

Electrical Engineer

SAIC - Panama City Beach, FL

January 2020 to August 2021

Perform various engineering tasks relating to the design, fabrication, and troubleshooting of electrical equipment for Naval vessels.

Projects include reviewing fabrication drawings and schematics, designing and fabricating electrical systems such as power distribution box, craft control box, writing code to a microprocessor to perform specific functions as desired by customer, and designing PCBs.

Projects also include continuous and detailed communication with customers to understand design requirements and deliver desired equipment in a timely fashion.

Use of Solidworks, AutoCAD, C programming, and Altium

Server

Outback Steakhouse - Pensacola, FL

June 2017 to January 2018

Time management and social skills

Server

Gilbey's Seafood and Steak - Orange Beach, AL
